Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-9, 11-17, 19, 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Ravenscroft (US 5702418). Ravenscroft discloses a stent delivery system comprising an outer shaft 25, an inner shaft 26 coupled to a rigid member 15 having a catheter 17 on its distal end. The inner member is slidably disposed within the outer member. A stent 50 is disposed on the distal end of the catheter.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 10, 18 are rejected under 35 U.S.C. 103(a) as being unpatentable Ravenscroft in view of DiCaprio et al (US 6176843). Claims 10, 18 differ from Ravenscroft in calling for a

valve to flush air from the sheath. DiCaprio teaches a device for delivering a stent having a valve 34 that allows air to be forced out of the lumen to prevent the possibility of an air embolism forming. Therefore, it would have been obvious to one of ordinary skill in the art at the time of invention to modify the device of Ravenscroft to have a valve as taught by DiCaprio to allow air to be purged from the lumen.

Response to Arguments

5. Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.
